SUNY COLLEGE OF ENVIRONMENTAL SCIENCE & FORESTRY

VARIOUS BUILDINGS

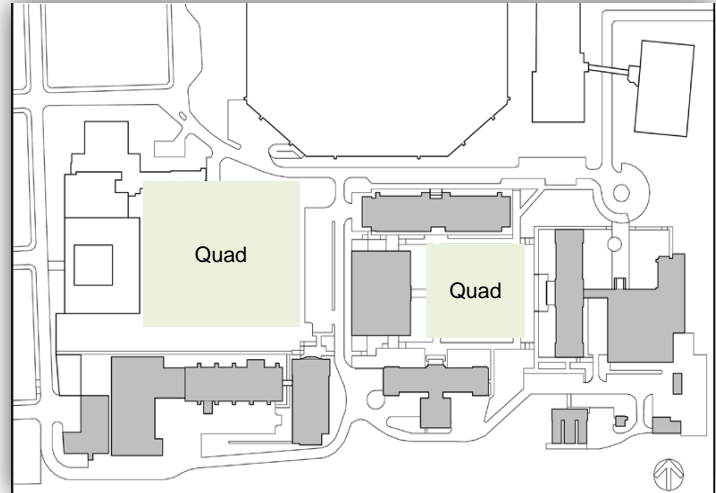

Facility Evaluation & Quad Improvements

Bell & Spina conducted a campus-wide study to evaluate buildings, analyze space usage, and develop a 5-year Campus Capital Plan for the SUNY College of Environmental Science and Forestry located in Syracuse, NY.

The main campus, adjacent to Syracuse University, has 13 buildings on about thirteen acres of land. In addition to the main campus, nine remote campuses in the Adirondacks, adjacent to the St. Lawrence River, and in Central New York were evaluated. The study concentrated on the Main Campus, Heiberg Forest, Wanakena and Cranberry Lake campuses. Overall, there are 170 buildings on 24,000 acres of land.

The plan covers space utilization, space management, existing facilities evaluation, academic planning with respect to physical space needs, project justification and description, and project prioritization. SUCF space guidelines, Division of Budget priority classifications, and other criteria provided by the Fund were used to evaluate and justify projects. Compliance with applicable building codes to correct structural and mechanical defects was part of the critical maintenance identification. Plant adaptation was addressed for changing institutional needs and to accommodate new program requirements in scientific and technical disciplines.

Improvements to the campus Quad were programmed to enhance its sense of place and to foster student interaction. This included a planned library expansion to define the west edge.

Site Plan of Buildings in Study Showing Quads

Work was further broken down into phases as follows:

- Inventory and Analysis
- Prioritized Campus Issues
- Goals and Objectives
- Five Year Capital Plan

In consideration of the large scope of this project, Bell & Spina created a menu-driven CD-ROM so all the information was clearly organized and easily accessible for the client.

Owner:

SUNY College of ESF
